1. jQuery form validations:

   Develop the form shown below using HTML to create a new user. The field level details and validations needed are provided below.

   Field level details and validations needed:

   - Name <String, Length(16), Mandatory, Validations: Minimum Length: 3, Can accept special characters>
   - Email <String, Length(60), Mandatory, Validations: Should be a valid email id>
   - Password <String, Length(16), Mandatory, Validations: Minimum Length: 5, Can accept special characters>
   - Create Buttons - "Create an account" and "Cancel"
   - Form should be Scrollable
   - For field validations, use jQuery
   - Ensure all validations pertaining to Name, Email and Password are taken care. If the use enters incorrect values, appropriate error message(s) should be displayed and should allow the user to enter corrected data.
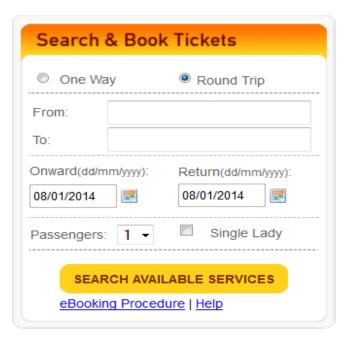

2. jQuery image slider:

   In an HTML page, insert a minimum of 5 images; ensure that the inserted images are scrollable.

   Hint: To make the images scrollable, use jQuery image slider or use JavaScript.

   Sample screen shots:

3. Develop the form shown below using HTML to search for and book tickets.

Validations:

1. All fields are mandatory except for the flag "Single Lady".
2. "Onward date" must be less than or equal to the "Return date".
